

## Technical Information Circular # 5

### STUB PERIODS

#### General Information

If the Program Year Margin or any of the Reference Margins represent less than 12 months of operation (a stub period), the income statement for the stub period may be combined with information from preceding statements until a minimum period of 12 months is available. The combined income and expenses will be prorated to reflect a 12 month period. Separate income statements for all combined periods must be reported.

#### Example 1 – Proprietorship transfers assets to a new corporation:

Producer A reported his taxes as a sole proprietor, with a year-end of December 31. He transferred all or substantially all of the proprietorship assets to a new corporation (Company A) on October 1<sup>st</sup>, 2020. The following table demonstrates the stub treatment for Producer A and Company A for AgriStability purposes:

Producer A, Proprietorship				
Program Year	Fiscal Year End	Number of Months in Program Year	Stub Required?	Stub % for Income Statement (Tax) and Supplementary Forms
2019	December 31 <sup>st</sup>	12	No	100%
2020	December 31 <sup>st</sup> *	9 (12 + 9 = 21)	Yes	<b>Stub % = 12/21 = 57.14%</b> (All information from 2019 & 2020 will be pro-rated to 57.14% for the 2020 Program Year information).
2021	N/A	N/A	N/A	No farm tax reported

Company A				
Program Year	Fiscal Year End	Number of Months in Program Year	Stub Required?	Stub % for Income Statement (Tax) and Supplementary Forms
2020	N/A	N/A	N/A	First fiscal year-end is in 2021
2021	September 30 <sup>th</sup>	12	No	100%

*\*Although the personal tax returns will likely report a fiscal year end of December 31 for 2020, the Administrator may only consider the 9 months ending September 30, 2020 into the stub calculation as the farming activity was transferred to the corporation on October 1, 2020.*

**Example 2 – Change in fiscal year-end of a corporation:**

In 2020, Company B changed its year-end from March 31<sup>st</sup> to September 30<sup>th</sup>. The corporation may file an AgriStability claim based on either of the 2020 year-end dates, but not both (i.e. it can only submit one claim per year). The following table demonstrates the stub treatment for Company B under both scenarios:

Company B				
Scenario 1: Use March Year-End for 2020 Claim				
Program Year	Fiscal Year End	Number of Months in Program Year	Stub Required?	Stub % for Income Statement (Tax) and Supplementary Forms
2020	March 31 <sup>st</sup>	12	No	100% **
** Note that March 2020 & Sept 2020 tax and supplementary information will be combined and pro-rated to 12/18 or 66.67% to create the 2020 reference year but neither the 2020 nor the 2021 Program Years will be stubbed.				

Scenario 2: Use September Year-End for 2020 Claim				
Program Year	Fiscal Year End	Number of Months in Program Year	Stub Required?	Stub % for Income Statement (Tax) and Supplementary Forms
2020	September 30 <sup>th</sup>	18	Yes	Stub % = 12/18 = 66.67% (Tax and supplementary information from both March & Sept 2020 will be combined and pro-rated to 66.67% as the 2020 Program Year information).
2021	September 30 <sup>th</sup>	12	No	100%

**The above examples are for demonstration purposes only.** As individual circumstances can widely vary, the AgriStability Program Administration (the Administration) will assess the correct stub treatment on a case by case basis.

In situations where a farming operation has a fiscal year of other than 12 months, the Administration may consider the fiscal period(s) to constitute a normal fiscal year and apply a Structural Change adjustment to the Reference Margin.

**Note:** Regardless of the fact that two (or more) fiscal periods may end in a given calendar year, only one (1) AgriStability claim/application is allowed per Program Year.

When calculating a stubbed margin, accrual adjustments (including accounts receivable, accounts payable, purchased inputs and hybrid inventories) are required in the calculation.
