# AFSC ready to assist clients impacted by 2019's challenging growing season

By AFSC staff

**T**he 2019 season was not easy for Alberta producers, as weather and other challenges had a serious impact on operations in many areas of the province. These weather conditions, including early snow in parts of the province, resulted in large amounts of unharvested acres.

By the second week of January 2020, when close to 98 per cent of harvested production reports for the 2019 crop season had been filed, 1,014,056 acres were reported unharvested. Of those acres, 504,988 were seeded to canola, 256,901 to wheat and 129,056 to barley.

In addition, a further 888,778 acres were reported with yields below their crop insurance coverage, due to excess moisture and snow during harvest. In this category, canola also took the biggest share with 457,559 acres, followed by wheat with 212,033 acres and by barley with 110,154.

Conditions this year are reminiscent of the 2016 harvest year, when AFSC recorded approximately 960,000 insured acres left unharvested. In 2019, unharvested acre projections are slightly above what occurred during 2016's snowed-under event, which totalled over \$93 million in compensation.

"2019 numbers aren't finalized yet, but we recognize weather events this year have been more broadly spread throughout the province, resulting in large numbers of unharvested areas in many areas, compared to events of 2016," shares Daniel Graham, manager, business risk management products.

During 2016, AFSC assisted producers through the Unharvested Acreage Benefit or a Post-Harvest Advance. In 2019, AFSC added the Preliminary Payment option. Once clients are able to harvest in the spring, or decide to put their acres to another use, they notify AFSC to assess the actual overwinter losses through

*"There is a strong likelihood that there will be wildlife damage on crops left in the field over winter. AFSC administers a federal/provincial wildlife damage compensation program to help with losses caused by wildlife."*

*— Daniel Graham  
Manager Business Risk  
Management Products at AFSC*

an on-farm inspection and calculate the final indemnity.

"When spring arrives AFSC will be ready to assist impacted clients; clients will need to notify us that they are ready to harvest their 2019 crop," notes Graham.

"2019 was an interesting year," he said. "Generally seeding was completed early, but dry conditions slowed plant growth. The summer saw varying amounts of rains across the province. The South region continued to experience dry conditions while the northwest and lower Peace regions received excessive amounts of moisture. Average temperatures during the growing season were cooler than normal, causing crop maturation to linger. When we got to the harvest season, precipitation and early snowfall added to the tough conditions producers were already facing."

He described this past year as an "extremely frustrating year for producers."

PHOTO: ALLAN DAWSON

Heading into harvest, yields for the south and the northwest regions were below average, while the remaining parts of the province were generally looking very good, but the delayed maturing of crops and wet weather during harvest started to affect the quality of the crop, and made getting the crop in the bin difficult or impossible in some areas.

“Producers were faced with crops that were not drying in the fields, along with field conditions that in many cases couldn’t support the harvest equipment. Throughout the fall, we were impressed with the ability of our clients to get crops off the field in spite of tough conditions,” said Graham.

“Our programs are designed to respond to issues beyond a producer’s control, including volatile weather during harvest. We recognize that our clients have financial commitments in the fall, and the crop insurance program has the ability to provide an advance on snowed-under crops, depending on individual circumstances, to help producers with cash flow.”

In response to the financial strains producers faced related to unharvested acres, AFSC offered loan payment relief through interest-only payments, payment re-amortization and payment deferral.

To address producer concerns, in November and December AFSC hosted a series of Town Hall Presentations in areas with large amounts of crops remaining in the field. These events allowed clients to learn more about the unharvested situation, ask questions and discuss their options.

AFSC CEO Steve Blakely recognizes the stress producers feel these days, facing potentially sig-

nificant losses. “Our programs recognize producers can’t control the forces of nature, and they are designed to respond in situations like this. We are here to help—and ready to work with our clients to support them through this difficult time.”

### **Unharvested acres vulnerable to wildlife, but covered by designated program**

Wildlife damage caused to snowed-under crops is another area AFSC has addressed in the course of the 2019 crop year.

“There is a strong likelihood that there will be wildlife damage on crops left in the field over winter. AFSC administers a federal/provincial wildlife damage compensation program to help with losses caused by wildlife,” said Graham.

The Wildlife Damage Compensation Program (WDCP) is jointly funded by federal and provincial governments and provides compensation up to \$0.62/bushel to clean crops damaged by wildlife. To benefit from this program, a producer does not have to have an annual crop insurance policy with AFSC. Producers do not have to pay any premiums to benefit from the WDCP, and with the exception of just a few categories, all crops are eligible for compensation.

Under the WDCP, as of early January 2020, AFSC has paid 821 claims totaling \$10.1 million dollars for damages to 2019 crops.

Producers can find more details on these programs at [www.afsc.ca](http://www.afsc.ca), or they can contact their local AFSC office or call the Client Service Centre at 1-877-899-2372 for additional information.

# Skills learned in 4-H give AFSC employee an edge in life

By AFSC Staff

**T**wenty-four-year-old AFSC Lending Relationship Manager Emily Henschel grew up on a cattle and grain farm outside of Wetaskiwin and was fortunate to have wonderful and thriving 4-H programs in her community. A member of both the Lakedell 4-H Beef Club and Wetaskiwin 4-H Light Horse riders, Emily had “the full 4-H experience” which she credits to amazing club leadership.

“I cannot say enough about the advantages of the 4-H experience. I was a member of two 4-H clubs for eight years and gleaned an abundance of knowledge, skills and personal and professional connections — not to mention a wealth of wonderful memories,” says Emily.

Being a 4-H member has allowed Emily to develop competencies in disciplines such as leadership, public speaking, record keeping, agribusiness, animal husbandry and showmanship. “The motto ‘Learn to do by Doing’ signifies the heart of agriculture, which to me means ‘get in there and get your hands dirty.’”

As a 4-H alumna, Emily touts the benefits of joining a local club. “There are wonderful opportunities for camps, workshops, fun days and competitions, where you hone your skills and have a lot of fun at the same time.” She was also able to travel to Quebec through the Seniors Selection program and had the unique opportunity to meet 4-H members from across Canada.

Emily credits 4-H for valuable life-long skills that translate both personally and professionally, “4-H gave me confidence in speaking, business, horsemanship, cattle and more.

“I love the agriculture industry and feel my 4-H roots have influenced me to pursue a rewarding career as a Lending Relationship Manager with Agriculture Financial Services Corporation (AFSC), where I use skills learned through 4-H.”

*Rodeo Queen Photo for Miss Grande Prairie Stompede Competition, 2019.*

PHOTO: IAN NEIL, NORTHERN LIGHT PHOTOGRAPHY

*Emily competing at the Canadian National Appaloosa Show with her Junior 4-H Project horse, Spot a Lot of Chip, 2014.*

PHOTO: FAYE UNRAU PHOTOGRAPHY

As a knowledgeable and supportive agricultural partner, AFSC recognizes the impact 4-H has on youth and agriculture in Alberta. As a Gold Clover sponsor, AFSC is extremely proud to support 4-H clubs and initiatives that promote agriculture advocacy and foster the development of future agriculture leaders. Many 4-H alumni leave their programs with transferrable skills, which are useful in their careers and relevant in the agriculture industry.

The AFSC 4-H Club Fund allows clubs, districts and regions to apply for funding up to \$500. Often clubs apply for funding to support some of the basic costs of their Achievement Days or supplies for projects. AFSC is honoured to help give 4-H members the opportunity to learn new skills, build relationships and experience new

opportunities. Through the Club Fund, in 2019, AFSC directly supported 84 clubs and 2,298 youth.

Today, Emily is an avid 4-H supporter and judges cattle competitions in the Peace Country. She sits on the Peace Country Beef Congress board, continues to show horses and was named the 2019 Grande Prairie Stompede Princess.

As she reflects on her time in 4-H, Emily emphasizes the impact it has made on her life, “4-H gives young people an opportunity to explore agriculture and interact in ag within a fun and exciting learning environment. 4-H builds good character, work ethic and connecting with others who have a heart for agriculture — I highly recommend it!”

For more information on the AFSC 4-H Club Fund, visit [afsc.ca/community](http://afsc.ca/community).

# 2019 Crop Insurance by numbers

By AFSC staff

**2** 019 was another trying year for Alberta crop producers, as unpredictable weather caused problems throughout the province.

Fluctuating weather patterns resulted in production shortfalls and quality loss for both perennial and annual crops. Spring 2019 was dry, which affected production for forage and pasture acres across the province. Alternatively, summer experienced high amounts of precipitation in the northwest and Peace regions, while the south continued to experience below-average rainfall. Crop maturation varied across Alberta due to below-seasonal temperatures during the summer. Early snowfalls and continued precipitation hampered the 2019 harvest, resulting in approximately one million insured acres left unharvested.

The number of unseeded acre claims was down from 1,298 in 2018 to 355 in 2019,

while indemnities decreased from \$3.4 million to \$862,782. Meanwhile, reseeding claims increased to 142 claims in 2019 versus 122 in 2018, and indemnities paid increased to \$1.7 million from \$857,771 paid in 2018.

Hail claims and indemnity payments increased in the 2019 crop year compared to 2018. There were 3,258 hail endorsement claims in 2019, for a total payment of \$272.5 million, compared to 2,911 claims in 2018, for a total payment of \$166.5 million. In 2018, AFSC paid \$14 million for 692 straight hail claims; in 2019, these numbers increased to \$26.1 million paid out over 712 claims.

This past year (2019) also saw a rise in insured annual crop and perennial crop acres:

## Insurance Coverage area (acres)

	2018	2019
Annual	15,014,001	15,237,281
Perennial	7,111,197	7,365,483

Figures for both annual and perennial crop insurance coverage rose in 2019 crop year.

## Insurance Coverage (Million \$)

	2018	2019
Annual	4,632.6	4,657.8
Perennial	198.5	243.6

A comparison of 2018 and 2019 total premiums (including Hail, SPE and Moisture Deficiency endorsements) are as follows: Overall, the indemnities paid to insurance clients in the 2019 crop year were as follows:

## Total Premium (Million \$)

	2018	2019
Annual	632.4	637.3
Perennial	22.1	28.5

# CALENDAR OF AFSC DEADLINES

## February 4

- Western Livestock Price Insurance Program (WLPPI) – Calf  
— Available to purchase for 2020.

## February 29

- Perennial Crop Insurance — Apply, make changes or cancel coverage.  
Remove grazing livestock from insured Export Timothy Hay fields.

## April 30

- AgriStability — 2020 enrolment and fee due (no penalty).
- Annual Crop Insurance — Apply, make changes (including updating your Declared Acres), or cancel coverage.  
Last day to file Land Report for fall seeded and perennial seed crops.
- Perennial Crop Insurance — Last day to remove grazing livestock from insured Hay fields.

## Prior to May 15

- Bee Overwintering Insurance — Notify AFSC 10 days prior to unwrapping hives. Coverage will be denied if AFSC is notified after May 15.

## May 28

- Western Livestock Price Insurance Program (WLPPI) – Calf  
— Last day to purchase for 2020.

## May 31

- Honey Insurance — Last day to file Report of Producing Hives and Hive Yard Locations forms.

## June 20

- Annual Crop Insurance — Last day to file Land Reports (without penalty), and report acres that remain unseeded due to excessive moisture.

## June 25

- Bee Overwintering Insurance — Last day to apply, make changes or cancel coverage.

## June 25

- Annual Crop Insurance, Perennial Crop Insurance, Straight Hail Insurance — Premiums received by AFSC the later of June 25 or within 15 days of each version's billing date receive an early payment discount.

## June 25

- Annual Crop Insurance — Last day to file Land Reports (with penalty).

## July 15

- Perennial Crop Insurance — Last day to file Report of Hay and Report of Export Timothy Hay in Storage Prior to Harvest.

## August 15

- Annual Crop Insurance — Last day to file Report of Grain in Storage Prior to Harvest.

## September 1

- Bee Overwintering Insurance — Last day to file Report of Bees Overwintered and Hive Yard Locations form.

## September 1

- Annual Crop Insurance, Perennial Crop Insurance, Straight Hail Insurance — Interest begins accruing on unpaid premiums.

## September 30

- AgriStability — 2019 Supplementary Forms due (without penalty).

## October 15

- Perennial Crop Insurance — Last day to file Hay and Export Timothy Hay Harvested Production Reports.

## October 30

- Honey Insurance — Last day to file Honey Harvested Production Report.

## Prior to Nov 1

- Bee Overwintering Insurance — Notify AFSC 14 days prior to wrapping hives. Coverage will not apply to hives wrapped after November 1.

## November 15

- Annual Crop Insurance — Last day to file Crop Harvested Production Report.

## December 31

- AgriStability — 2019 Supplementary Forms — last day to file (with penalty).  
2020 Fee - last day to pay (with penalty) to be eligible for 2020 program year.
- Annual Crop Insurance, Perennial Crop Insurance — Last day to file Harvested Production Reports (with late-filed fee).
- Annual Crop Insurance, Perennial Crop Insurance, Straight Hail Insurance — Last day to pay premiums without negatively affecting your credit.

# MAKE EVERY PLANT COUNT

## GET THE MOST OUT OF YOUR INVIGOR.

When you seed your InVigor® hybrid canola this season, aiming for a target plant population of 5 to 7 plants/ft<sup>2</sup> can help you optimize the yield, performance and consistency of your crop. Just a few adjustments to your current practices, such as calibrating your seeding rate based on Thousand Seed Weight (TSW), can help ensure that every plant counts at harvest.

### **BENEFITS OF A TARGETED PLANT POPULATION OF 5 TO 7 PLANTS/FT<sup>2</sup>:**

- Increased plant productivity and yield performance
- More efficient use of available resources
- Improved weed control and reduced intra-crop competition
- Elevated stress tolerance
- More even maturity and uniform plant structure
- Improved lodging resistance and lower sclerotinia incidence

To learn more on how to implement a Targeted Plant Population on your farm this season, visit [agsolutions.ca/InVigorRATE](https://agsolutions.ca/InVigorRATE) or call AgSolutions® Customer Care at 1-877-371-BASF (2273).

**BASF**  
We create chemistry

**InVigor®**

# Canola is inherently Canadian. So is Liberty 150.

## Made for Canadians. By Canadians.

In this country, canola growers are particularly proud of what they produce. We feel exactly the same about Liberty® 150 herbicide. Produced according to the highest industry standards in Regina, SK, it's been the go-to solution in canola for over two decades. So why settle for anything less? After all, **you get what you pay for.**

To learn more, visit [agsolutions.ca/Liberty](http://agsolutions.ca/Liberty) or call **AgSolutions®** Customer Care at 1-877-371-BASF (2273).

**Always read and follow label directions.**

## AAC Viewfield

### The Stand-Up Wheat

AAC Viewfield is a top yielding, short, semi-dwarf CWRS with leading sprout tolerance and the highest standability ratings. It stands poker straight, making production and harvest a breeze. AAC Viewfield has a good disease package including high resistance to FHB and has been praised for its good colour retention through recent difficult harvests.

#### Highlights

- Top of class in standability
- Shortest semi-dwarf CWRS
- Good sprouting resistance for high grain quality
- Easy to harvest
- Very high yielding, top of CWRS class across the prairies

# SEED EVERYTHING AND THE KITCHEN SINK.

Get a more complete and faster burnoff when adding Aim® EC herbicide to your glyphosate. This unique Group 14 chemistry delivers fast-acting control of your toughest weeds. Aim® EC herbicide also provides the ultimate flexibility, allowing you to tank mix with your partner of choice before planting virtually any major crop.

Fire up your pre-seed burnoff with Aim® EC herbicide.

**CANOLA | LENTILS | WHEAT | BARLEY | & MORE**

**Ace Resistant Weeds by mixing Aim® EC with Express® brands and/or Command® 360 ME – receive up to \$5.50/ac back.**

Always read and follow label instructions. Member of CropLife Canada.

## Grain Producers: Changes to wheat variety designations

**Effective August 1, 2021**

The following Canada Western Red Spring (CWRS) wheat varieties will move to the Canada Northern Hard Red wheat class:

- AAC Redwater
- AC Domain
- Muchmore
- Vesper
- 5605 HR CL

**GENTLE ON CROPS.**

**TOUGH ON WEEDS.**

**BARRICADE<sup>®</sup> II**  
HERBICIDE

**SEND WEEDS TO THE PLACE OF NO RETURN.**

Turn the tables on broadleaf weeds like narrow-leaved hawk's-beard, cleavers and kochia with Barricade<sup>®</sup> II herbicide – without compromising your crop health. Two modes of action, a wide window of application and outstanding re-cropping flexibility make Barricade<sup>®</sup> II herbicide a sound choice for wheat and barley growers.

**SPRING WHEAT | DURUM WHEAT | BARLEY | WINTER WHEAT**

# You've Got What it Takes

Farming isn't easy. It takes more than just a plot of land, machinery and seed. It takes experience. It takes passion and determination. It takes a plan, and a back-up plan.

You've got what it takes to farm, and we've got what you need to ensure you keep farming.

Talk to an AFSC Relationship Manager today to see how we can help you plan for 2020.

# Unlock the power of four modes of action

**Adding new Intruvix™ herbicide to glyphosate gives your burnoff the right combination of performance and resistance management.**

Intruvix™ herbicide from FMC provides contact and systemic control of broadleaf weeds before planting cereals, including narrow-leaved hawk's-beard, volunteer canola and many other target weeds. That means cleaner fields and great crops today and sustainable glyphosate use for the future.

**SAVE ON INTRUVIX™ HERBICIDE WITH FMC GROWER CASHBACK.**

# THIS SEASON, COME PREPARED

The growing season comes with unexpected challenges, and if you knew the outcome, making decisions would be easy. We understand you need to optimize productivity, which is why we continue to partner with Syngenta for best-in-class seed technology. SY Obsidian delivers on competitive yields and a robust disease package, allowing you to focus on what you do best.
