

These are the proposed changes for the 2020 Program Year currently being reviewed.

From the Canadian Agricultural Partnership Guidelines:

4.3.2 Private insurance payments

1. Indemnity payments from private insurance programs that are fully producer-funded are non-allowable in the Program Year Margin and allowable in the Reference Margin where they relate to:
 - price or revenue insurance associated with the sale of allowable commodities
 - price insurance associated with the purchase of allowable expenses
 - production insurance covering the production of allowable commodities (e.g. private hail insurance)
 - other income insurance, such as margin-based or guaranteed minimum income insurance
2. Indemnity payments from private insurance programs not outlined above, that compensate Participants for the replacement of eligible agricultural commodities or allowable expense items, are included as allowable income in both the Program Year Margin and the Reference Margin (e.g. payments for inputs destroyed by fire).

Private Insurance Codes and descriptions - 2020 Program Year

Program Payment	Code
AgriInsurance (production/crop insurance) - Edible horticulture crops	402
AgriInsurance (production/crop insurance) - Grains, oilseeds and special crops	401
AgriInsurance (production/crop insurance) - Non-edible horticulture crops	470
AgriInsurance (production/crop insurance) - Other commodities, including livestock	463
Private hail insurance	407
This new code will be allowable for both AgriStability and AgriInvest. Indemnity payments from private insurance programs not outlined above, that compensate Participants for the replacement of eligible agricultural commodities.	681
This new code will be allowable for AgriStability but non-allowable for AgriInvest. Indemnity payments from private insurance programs for the replacement of allowable expense items.	406
Private insurance proceeds for allowable commodities (production/price/margin insurance)	661
Western Livestock Price Insurance Program (WLPPI)	667

Code 407: This new code will cover the hail insurance that was moved from the AgriInsurance codes. It has the same treatment as code 661. For AgriStability, it will be non-allowable in the program year but allowable in the reference years. It will remain allowable for AgriInvest.

Code 681: This new code will be allowable for both AgriStability and AgriInvest: Indemnity payments from private insurance programs not outlined above, that compensate Participants for the

replacement of eligible agricultural commodities

Code 406: This code is allowable for AgriStability in both the Program Year and the Reference Margin but non-allowable for AgriInvest: Indemnity payments from private insurance programs for the replacement of allowable expense items.

Code 661: Covers all indemnity payments outlined in #1 under 4.3.2. Amounts would be non-allowable for AgriStability in the program year but allowable in the reference years. It will remain allowable for AgriInvest.

Code 667: The code and description for WLPIP will remain the same; however the treatment will change. For AgriStability, it will be non-allowable in the program year but allowable in the reference years. It will remain allowable for AgriInvest.
